

NEW
SOLUTIONS
FOR YOUR
SUPPLY CHAIN

Do you want total synchronization? Let us optimise your entire supply chain.

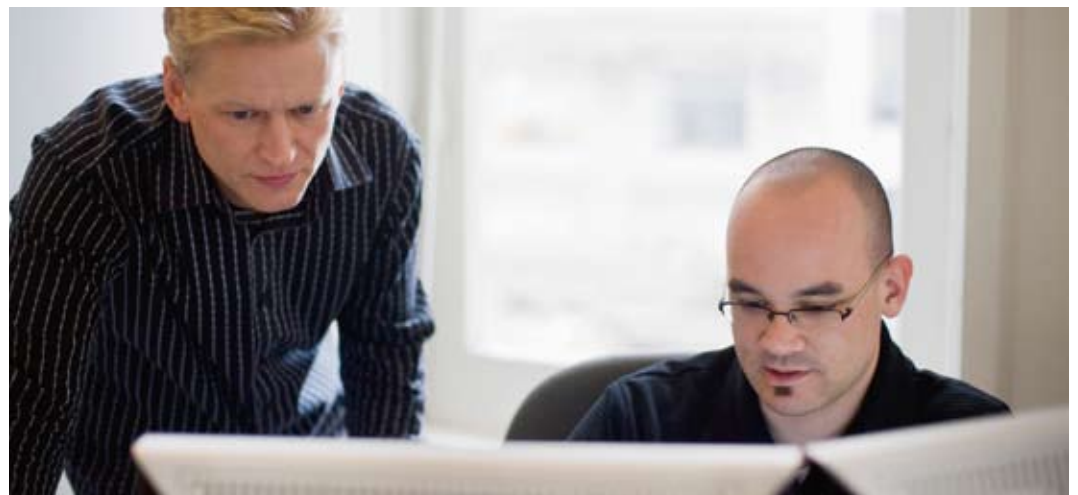

Are you facing major logistics challenges due to globalisation, rapid growth in new markets and increased competition? Does your supply chain need to be optimised and adapted to market changes, global fluctuations in demand and unpredictable customer behaviour? Preferably with a truly professional logistics partner? A partner who can respond quickly, flexibly and individually? Then Logwin is that partner!

Our information systems: pro-active and transparent

Do you expect perfect integration across all processes and interfaces along the supply chain? Then Logwin is the one! Our cutting edge IT network provides interfaces connecting all stakeholders worldwide. Based on our innovative SCEM systems, we can ensure continuous tracking and proactive communication – along the entire transportation chain, across all continents and modes of transport. We are able to detect hiccups or bottlenecks in good time, proactively alert all parties and flexibly initiate the required steps in real time. You can depend on it.

Logwin: decades of experience, specialized infrastructure and expertise

These are the three factors that make Logwin the capable and trustworthy partner you require. We have been developing individual logistics strategies to optimise supply chain management for our customers for decades. For instance, for the automotive and chemical industries, as well as for consumer goods and fashion enterprises. As the leading logistics provider we handle a diverse range of responsibilities, from planning individual transport chains to freight management and budget audits.

We can plan, design, manage and optimise your supply chain.

Planning and design

- Tailored customer solutions
- Customised development and implementation of an individual supply chain strategy
- Comprehensive support for supply chain security
- Planning of individual road, rail, water and air transportation networks – including locations and routes
- Individual alternative strategies and comprehensive risk and bottleneck management.
- Established and continually growing network of branches to provide global assistance in opening up new markets
- Continuous benchmarking

Management and control

- Deployment of latest IT systems to network customers, suppliers and partners
- Years of experience and successful cooperation with big name customers
- Use of cutting edge supply chain management software

Optimisation

- Optional integration of financial services
- Handling of all transportation upon request
- Expertise in use of specialised infrastructure and all modes of transportation
- Goods supply not dependent upon mode of transport

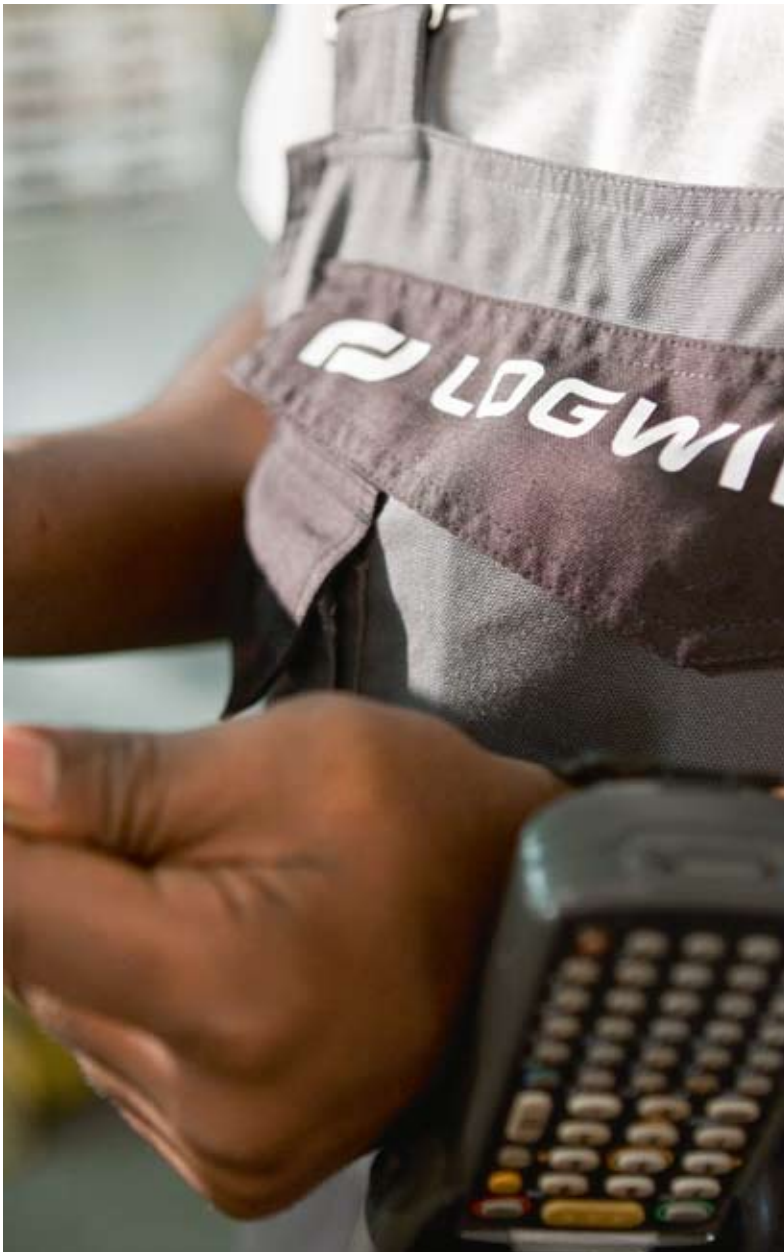

We can make logistics your strategic key to success.

Clearly impressive: Your benefits at a glance

- Transparent supply chain
- Optimum utilisation of synergies
- Outstanding problem-solving expertise
- Cost flexibility and optimisation
- High degree of planning security
- Superior quality and impeccable delivery
- Minimal investment costs
- Reduced inventory
- High safety standards

INDIVIDUAL,
INNOVATIVE AND
GLOBAL:
