

Sea-Air Logistics

Multimodal solutions from a single source

Perfect double

Sea or air freight? Use both and benefit from the intelligent combination of dual freight forwarding systems. How is that possible? By shipping your goods on the first leg of a long journey by sea and then by air for the second leg. The result: A perfect double – cheaper than air freight and faster than sea freight.

Smart transfer

We can combine sea-air consignments for you from the Far East to Europe, the USA or South America. Your goods are transhipped at our hubs in Dubai (UAE) or Busan (Korea). Our highly skilled Logwin team coordinates the transshipment and organises the seamless transition from sea to air ensuring your shipments reach their destination on the double.

Combined, not complicated

Does changing modes of transport sound complicated? We make it easy for you. The only difference you will notice about the modified schedule is the speedy, cost-efficient delivery. Your usual contact person is available to clarify any questions you may have. We coordinate the entire flow of goods and information through our international Sea-Air Centre in Dubai. So we always have the complete supply chain at our fingertips, delivering a quality of transportation management that is second to none.

Innovative IT

Exchanging the latest information, responding rapidly to unscheduled deviations, thoroughly documenting all stages of transportation – our high-performance IT systems ensure procedural reliability the whole length of the supply chain, while guaranteeing optimum transparency. Using our ‚Logwin Bots‘ tracking tool we can access all relevant consignment data directly at any time.

Our services

- Regular consolidated sea freight consignments
- Rapid transshipment in the transit harbour and at the hub
- Direct flights from the hub to major business centres
- Central supply chain management
- Innovative IT systems
