

OUR
ANSWERS
FOR
AUTOMOTIVE LOGISTICS

You expect dynamic response and intelligence from your logistics provider. We are that provider.

Your management of complex supply chains must run perfectly. The same holds true for sequential deliveries and pre-assembly. Worldwide fluctuating sales trends, tight schedules, almost completely exhausted potentials for savings, as well as networked production sites, means you are faced with great responsibilities. Logwin is the partner that understands your needs today and in the future – the partner that studies your structures.

For many years Logwin has been the logistics partner of prestigious automobile manufacturers and subcontractors. Logwin represents longstanding experience and competence in all logistics processes. Our global network offers you integrated

logistics solutions to meet the demands of your capacities. In other words, collaborative solutions with Logwin can support you in slimming down your processes while also ensuring a supply chain optimised for both quality and cost.

Always reliable

Logwin can develop and implement exactly the logistics solutions that you need – calibrated to your demands for depth of process and spectrum of services. In doing, so we can cover the entire supply chain, from the procurement of raw materials to the just-in-sequence delivery direct to your assembly lines on through to port providing for the import and export of new cars.

Highest quality

Regardless of what requirements you have – we work for you according to the principles of operational excellence: highest quality standards, certification to VDA 6.2 and procedural audits to VDA 6.3 are self-evident for us. With the constant transfer of knowledge in our global network and the specific training and furthering education of our employees, we also employ the most modern IT systems. Doing this we create automotive-specific interfaces that connect all involved around the world, provide uninterrupted tracking & tracing, and enable proactive communication.

Environmental responsibility

It is our responsibility to determine the ramifications of our operations for the environment and to monitor them. Thus Logwin and its employees around the world are continually looking for ways to reduce our environmental impact. For example, we have innovative logistics centers, alternative transportation concepts, the most modern fleets, sustainable packaging optimisations and always in line with the highest, most current safety standards. For Logwin, economy and ecology go hand in hand.

You are looking for a logistics provider that will put you at the front of the pack? We can do that.

With analysis, consultation and using well-engineered IT solutions we can provide you with customised concepts along the whole automotive supply chain.

Procurement

Logwin can direct the worldwide procurement logistics for you from our network of suppliers – from order processing to inventory management, quality control and customs clearing, on down to bill processing. In our international network we manage global supply chains, bundle procurement streams through cross docking and administer consignment warehouses. In this way you profit from absolute security in supply with simultaneous inventory minimisation and optimised transportation.

- Innovative industry solutions
- eSupply®/Supplier integration
- Development and optimisation of transportation packaging
- Goods receiving and quality controls
- Comprehensive value added services, like pre-assembly, pre-fabrication and set creation

Transport

As an international contract logistics service provider, Logwin offers you the entire spectrum of efficient automotive transportation. Regionally, nationally and globally we are there for you with our network of company-owned subsidiaries as well as strong partners. Logwin guarantees you consistent quality standards across the globe.

- Organisation of direct traffic, as well as between factories and sub-contractors via rail and road
- Multimodal transportation via truck, train, plane, barge and seagoing vessel
- An international network with connections to the global procurement, production and sales markets
- Perfectly timed spare parts logistics
- Special and heavy transports
- Customs clearing for import and export

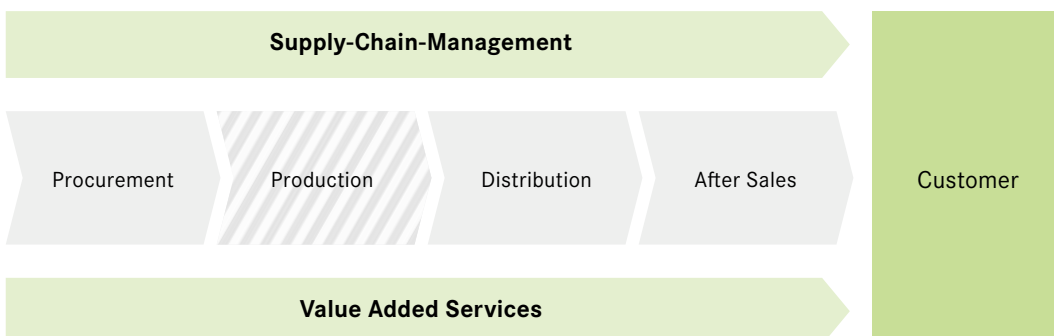

Logistics close to production

Whether it's raw materials or assembly components, we ensure deliveries on schedule into the running production. Within the framework of a professional automotive supply chain we also deliver production supplies as you need them direct to the assembly line, as well as the punctual pickup off the line.

- SILS Center (Supply-in-Line-Sequence)
- Perfectly timed delivery to your production lines: Just-in-Sequence/Just-in-Time
- Demand-actuated supply of production and disposal through KANBAN
- Order picking and packing
- Trailer yard management
- Container management
- A variety of value added services like packaging management, as well as pre- and post-production processing services and disposal

Your supply chain – our services

Warehousing

Regardless whether you need it in Europe, Asia, South America or South Africa, with Logwin your goods are always secure and quickly available. Our flexible warehousing solutions run the gamut from cross docking to short-term storage and inventory management down to total outsourcing. The development of intelligent warehousing, picking and outsourcing strategies belong to the spectrum of services that we offer, just as they also include inventory processing, return management and a variety of other value added services.

- Your own hall and warehouse areas
- State of the art warehouse management systems
- Electronic Data Interchange
- Vendor Managed Inventory
- Completely and/or Semi Knocked Down (CKD/SKD)
- Consignment warehousing
- Individually commissioned solutions from voucher-supported to Pick-by-Voice/Pick-by-Light

Distribution

Regardless of which finished product you are delivering to your customers, Logwin offers you solutions tailored to your demands for distribution logistics. Furthermore we can also handle your temporary storage, disposition and returns processing.

- Integrated solutions for global delivery with warehousing, transportation and IT solutions
- Distribution within the global Logwin network via road, rail, air and sea
- Customs clearing
- Online Tracking

After-Sales-Services

Always and everywhere: Logwin is nearby and always there for you. Supplying garages and dealers with automobile spare parts is a particularly time-sensitive endeavour. So that you do not lose any valuable time, we ensure the quick delivery of accessory and spare parts to your customers with centralised and decentralised spare parts warehouses – thus avoiding cost-intensive standing times. And we do it all over the world. For example, with Service Parts Direct® we can pick up urgently needed spare parts in the morning and deliver them in the afternoon to the garage. The basis of this efficient Logwin After-Sales-Services is our transportation network as well as efficient warehousing concepts. These make an overview of inventory possible at any time, as well as permanent monitoring – thus ensuring the timely replenishment of parts and avoiding supply shortages.

- Same-Day-Service (Parts Direct®)
- Overnight-Service
- Individualised and ongoing tour optimisation
- Platform services as the interface between drivers and loaders
- High availability of the deployed vehicles through central transport fleet disposition
- IT tools for planning, monitoring and evaluation of the tours
- Returns management
