## The Netherlands

The tulips and windmills of the Netherlands inspired men like Rembrandt and van Gogh to achieve greatness. The homeland of these two outstanding artists is well known for many reasons: its beautiful natural environment, its delicious cheese, the popular bicycles, those world-famous wooden clogs, and, of course, the Dutch Royal Family.

But as if all that wasn't enough, the Netherlands has even more to offer. For professional logistics services, Holland is where it's at. Located at the North Sea coast, the country is a gateway right to the heart of Europe. When it comes to providing every conceivable value-added logistics service, the Dutch are second to none.

### Gateway to Europe

In the Netherlands, Logwin knows how to make things happen. We cover everything from cross docking operations to reworking and repacking of goods at product level, right through to consignment tracking. Our experienced team also takes care of customs clearance and distribution throughout Europe. That leaves you free to fully focus on running your business.

As an Authorized Economic Operator, Logwin uses a variety of online networks. We are connected to customs authorities, the Chamber of Commerce, Intrastat and CBS Reporting, allowing us to obtain import and export licenses quickly and easily. We save you even more time with local fiscal representation, truly a service that saves you money.

### Integrated solutions

As part of the global Logwin network, our distribution centres in the Netherlands can handle complete FCL and LCL consignments for you. And as an IATA agent we are your partner when it comes to airfreight as well. Do your products require special handling? At our branches in Amsterdam, Rotterdam and Venlo, we will gladly provide a service that meets your needs. From fashion to sensitive high-tech products, from hazardous goods to cosmetics, Logwin provides you with efficient, integrated logistics services.
