# MASTERING THE LOGISTICS CHALLENGES OF A **FASTER-MOVING** WORLD

## **Combining proven elements to create a better whole**

The companies of the former Thiel Logistik Group now operate as a single, integrated logistics provider under a new common brand, Logwin. This generates synergy, and means skills and resources can be combined to better meet your needs. Logwin is your reliable, experienced logistics partner, capable of growing with you and your tasks – to master the logistics challenges of a faster-moving world.

## **Expect intelligence, drive and passion**

Globalisation, the Internet economy, and the rapid growth of new markets open up a host of great opportunities for business people with ideas. We promise to help set your ideas in motion.

How? We'll listen to your every word. We'll provide and develop the right logistics solutions for your specific needs. Moreover, we'll respond quickly and flexibly. We love what we do.

### **A meticulous and innovative approach to solving your challenges**

Our goal is to combine reliability, efficiency and innovation to find the right solution to your needs. That's why we see ourselves as an expert service provider – and as an integral part of your value chain. We know that every second is precious, and that you have obligations towards your customers to fulfil. So we get things moving, and you have more time and energy for your core business.

### **Making the right connections**

You can count on Logwin to master complexity. We integrate disparate systems and processes for maximum transparency and stability – in warehousing, transportation, internal logistics and more. In addition, we offer customised IT tools for supply chain management and world-wide tracking solutions.

# **WE UNDERSTAND YOUR BUSINESS. WE FULFIL YOUR REQUIREMENTS**

### **Looking for an end-to-end solution? Look no further!**

You know better than anyone: in today's business environment, success does not simply depend on what you do, but to a great extent on how you do it. That's why Logwin does not just take your goods from A to B. We can do a whole lot more for you at A and B, too. And if you are wondering whether we can really do so much, the answer is yes. What's more, not only do we enjoy it, we're good at it, too. For example, we can provide pre-assembly services for manufacturers, press clothes for fashion companies, perform filling tasks for chemicals players, or even provide you with a call centre and develop packaging solutions.

# WE'RE AT TODAY'S **THE HEART** OF **BUSINESS WORLD**

## **The door to China is wide open**

We manage your air and ocean freight between all continents – and are present there, too. Take a look at China, for example – an exciting place right now. We have got the necessary government A-class licenses for logistics and are a wholly foreign-owned company that can help you penetrate this emerging market quicker and easier. Local distribution and value-added services are also part of the package. More than 30 years' experience and 20 branch offices in China can make a key difference to the way you do business in this fascinating country.

## **Penetrating new markets in Eastern Europe**

In the expanding regions of Europe, Logwin has a firmly established and constantly growing network of facilities that meet international quality standards. Several hundred employees at 90 sites ensure a seamless flow of goods and link Eastern and Western Europe by road and rail. This helps you to rapidly penetrate these growing markets – accelerating your time-to-market. You do not have to establish your own resources. We are already there for you – with our own warehouses, and with the necessary knowledge and experience of local legislation, customs regulations and transport infrastructure to help you operate successfully.

# FOCUSSED, COST-EFFECTIVE – AND IN A SPIRIT OF PARTNERSHIP

## Breaking new ground together

If you are looking for a service provider with real insight into your business, then you've come to the right place. We are not just logistics experts, we're logistics experts, who take the time to get to know and understand the way you work. As a result, we are more efficient, more cost-effective and can create truly innovative solutions. Set us a challenge! We're keen to break new ground with you – in more than one way.

## Your industry has specific logistics needs, your business is unique

We have proven experience, specialised infrastructures and in-depth knowledge of diverse industries. We develop tailor-made solutions to specific challenges for a range of sectors, including automotive, chemicals, engineering, retail, fashion, consumer goods, and more.

## Close collaboration is the key

Logwin is not the biggest of the big players. And that's why we're able to form strong customer relationships. That means we work hand in hand with you to develop effective, international logistics concepts. At Logwin, we don't just see customers, we see people, we see partners. This close relationship is the basis of successful collaboration – and trust. And it's also the reason we're called **Logwin – Your Logistics.**

**NO MATTER WHERE  
YOU WANT TO DO  
BUSINESS, WE'RE THERE.**
