

Logwin: high costs of transportation impact first quarter result

- **Sales: 329.9 million euros / Operating income: 6.1 million euros**
- **Solutions: reduction in structural costs to increase efficiency**
- **Air + Ocean: stable income with declining sales due to freight rates**
- **Net result: 2.9 million euros**

Grevenmacher (Luxembourg) - The Logwin Group generated sales of 329.9 million euros in the first quarter of 2012. This represents a decrease of 1.9 % over the previous year's figure (2011: 336.3 million euros). Operating income (EBIT) in the reporting period amounted to 6.1 million euros and was thus 2.3 million euros below the figure for the previous year (2011: 8.4 million euros). There was a corresponding decline in the EBIT margin to 1.8 %. Net financial result once more improved to -1.7 million euros (2011: -2.6 million euros). Overall, the Logwin Group concluded the first quarter of 2012 with a net result of 2.9 million euros (2011: 3.4 million euros).

Berndt-Michael Winter, Chairman of the Executive Committee (CEO) of Logwin AG comments, "We cannot be satisfied with the result in the first quarter. Performance at Solutions was disappointing due to the extremely high costs of transport and it did not come up to our expectations. We will therefore get the business segment on track through targeted measures aimed at reducing administrative costs and increasing operational efficiency. One example of these is the long-term framework agreement with DTL aimed at improving the utilisation of our retail network. Air + Ocean again showed solid business performance, which we also expect to see through the rest of the year."

The business segment **Solutions** generated sales of 181.5 million euros in the first three months, which represented a slight increase (2011: 180.7 million euros). The functional unit Logistics and Warehousing experienced positive growth and higher volumes than last year, particularly in activities in the region Central and Eastern Europe. The General Cargo unit also achieved moderately positive growth. Retail Network, part of the functional unit Transport and Retail Networks, similarly reported a slight growth in sales, while the Media unit was faced with falling volumes. Operating income (EBIT) for the reporting period totalled 1.3 million euros (2011: 4.2 million euros). Increased fuel and transportation costs had a significant impact on this. Expenses incurred for measures aimed at reducing structural costs and increasing efficiency and productivity at the business segment also affected operating income.

At the business segment **Air + Ocean** sales declined compared with the previous year to 148.6 million euros due to continuing lower freight rates (2011: 155.7 million euros). Despite lower sales, the previous year's performance level could be maintained. The business segment achieved operating income (EBIT) of 6.0 million euros in the first three months of 2012, also assisted by special effects (2011: 5.9 million euros). Asian business units in particular showed pleasing development in the first quarter.

Outlook

The Logwin Group assumes that there will be continued recovery in the German and global economies in the current year. This should have a positive effect on business volumes and consequently on sales. The Logwin Group expects stable earnings for 2012 compared with last year and has already initiated measures aimed at reducing costs and improving profitability, particularly in the business segment Solutions. Their implementation will shape performance at the business segment Solutions in the current year. The business segment Air + Ocean anticipates continuing robust business development with increasing freight rates over the course of the year. Moreover, reduced interest expenses will also have a positive effect.
