

## **Logwin Opens New Air and Ocean Freight Branch in Bilbao**

Logwin Air + Ocean is strengthening its presence on the Iberian Peninsula with the opening of a new branch in Bilbao. With this strategic move, the international air and ocean freight provider is specifically expanding its capacities in Southern Europe and responding to the growing demand for efficient international transport solutions.

### **Strategic Location for International Air and Ocean Freight**

Bilbao was chosen as a location due to its outstanding geographic position in the Basque Country. The Port of Bilbao is one of the most important Atlantic ports in Europe, offering excellent connections, particularly to Latin America. Complementing this is Bilbao Airport, which enables efficient international air freight connections. With this, Logwin Air + Ocean is creating a powerful hub for intercontinental cargo flows.

The economically strong region is characterized by industries such as automotive, mechanical engineering, metal processing, as well as plastics, paper and food production, providing ideal conditions for specialized logistics solutions.

### **Service Portfolio at the Bilbao Location**

- International ocean and air freight solutions
- Customs clearance and customs-related services
- Tailored supply chain concepts for demanding sectors such as pharmaceuticals and food & wine

With the new branch, Logwin Air + Ocean is strategically expanding its European network, supporting customers in efficiently managing global supply chains and facilitating their international growth.
