

## Logwin invests in pharmaceutical and food logistics by acquiring the Hanse Service Group (Hamburg)

**Grevenmacher** (Luxembourg)–At the beginning of 2025, the Logwin Group acquired the shares in Hanse Service Internationale Fachspedition GmbH and Pharmedlogisticspartner Internationale Fachspedition GmbH, both based in Hamburg. With this strategic step, Logwin is expanding its expertise in the areas of pharmaceutical and food logistics.

Hanse Service Internationale Fachspedition was founded in 1983 and has since established itself as a reliable partner for the pharmaceutical and food industries. Together with Pharmedlogisticspartner, the two companies employ 42 people at two locations in Hamburg and have 7,600 m<sup>2</sup> of temperature-controlled storage space. With appropriate certifications (GDP, Pharma Wholesaler and IFS) and customised logistics solutions, Hanse Service meets the high demands of its customers. The service portfolio includes air and sea freight, warehousing as well as the use and distribution of specialised packaging solutions.

With the acquisition of the Hanse Service Group, Logwin is setting a milestone in the strategic development of logistics solutions for the pharmaceutical and food industries. The know-how and expertise of the Hanse Service Group are expected to enable Logwin to significantly expand its services, particularly in the area of temperature-controlled logistics, both nationally and internationally.

The previous owners of the Hanse Service Group, Jörg Brinkmann and Thorsten Eckel, will remain with the company as managing directors, thus ensuring continuity in operational management and the seamless continuation of business and sales activities. Brinkmann and Eckel emphasise the synergy potential seen by Logwin: ‘As part of a global logistics company with a worldwide network, we see great potential to transfer our experience to other countries and to be able to offer existing and potential customers even more attractive logistics solutions.’

With this acquisition, Logwin is sending a strong signal for growth and innovation in a challenging market environment.
