

Up-to-date information using the new Logwin app plus an interactive platform for employees

Grossostheim – Logwin launched its own app on 1 July. With their smartphones and tablets, users can now get concise and up-to-date information on the company's locations and activities worldwide. The app is available free for Android and iOS from all relevant stores, such as Google Play Store, App Store and Baidu App Store.

“Picture of the Day” platform for colleagues

A feature for employees is the interactive "Picture of the Day". Logwin employees can upload snapshots, along with a brief text, of the diverse jobs they are doing at Logwin. Every day, one of these images will be selected by an editorial team and published as "Picture of the Day" in the Logwin app. Employees can then quickly and simply see what others are doing at Logwin locations around the globe. Only three weeks after launch, more than 1,000 Logwin employees have already registered for this feature.

Further investment in internal communications

With the new Logwin app, the company is making the most of the popularity of mobile services worldwide, and strengthening internal communications between colleagues from different business areas and international locations. In doing so, it is particularly important to enable employees to help shape the content themselves. The "Picture of the Day" makes this possible in a simple, entertaining and informative way. Close by. International. Professional. Dedicated. Logwin's attributes can now be experienced daily as "Picture of the Day".
