

New country organisation in France: Logwin continues to grow in Europe

Grevenmacher (Luxembourg) – In August 2018, Logwin expanded its air and sea freight network by establishing a new country organisation in France.

France is one of the world's most important trading partners. In recent years the country has shown itself to be very forward-looking especially in the fields of aviation, rail and energy technology.

By opening a new country organisation in France, Logwin is expanding its presence in one of the most important European markets and can now provide services to customers from its own office.

The French national organisation was immediately connected to the global IT system to guarantee a smooth flow of information in both sea and air freight at the Charles de Gaulle Airport hub in Paris.

About Logwin AG
